

**UNITED BANK LIMITED
CAPITAL ADEQUACY AND LIQUIDITY DISCLOSURES - CONSOLIDATED
AS AT DECEMBER 31, 2019**

1. CAPITAL ADEQUACY

- 1.1 The State Bank of Pakistan (SBP) through its BPRD Circular No. 6 dated August 15, 2013 has issued Basel III Capital instructions for Banks / DFIs. The revision to the previously applicable Capital Adequacy regulations pertain to components of eligible capital and related deductions. The amendments have been introduced with an aim to further strengthen the existing capital related rules. Basel III instructions have become effective from December 31, 2013; however, there is a transitional phase during which the complete requirements would become applicable with full implementation on December 31, 2019.

The Bank's capital adequacy is reported using the rules and ratios provided by the State Bank of Pakistan. The capital adequacy ratio is a measure of the amount of a Bank's capital expressed as a percentage of its risk weighted assets (RWAs). Banking operations are categorized as either Trading Book or Banking Book and RWAs are determined according to specific treatments as per the requirements of SBP that measure the varying levels of risk attached to on balance sheet and off-balance sheet exposures. Under the current capital adequacy regulations, credit risk and market risk exposures are measured using the Standardized Approach and operational risk is measured using the Basic Indicator Approach. Credit risk mitigants are also applied against the Bank's exposures based on eligible collateral.

The Bank performs its Internal Capital Adequacy Assessment Process (ICAAP) as per the guidelines provided by the SBP. The ICAAP has been approved by the Bank's Board of Directors and submitted to the SBP. The Bank additionally covers risks not included under Pillar I, so as to carry adequate capital for potential business risks.

1.2 Capital Management

The objective of managing capital is to safeguard the Bank's ability to continue as a going concern. It is the policy of the Bank to maintain a strong capital base so as to maintain investor, depositor and market confidence and to sustain future development of the business. The Bank aims to maintain an optimum level of capital along with maximizing shareholders' return as we consider a sound capital position as more appropriate as opposed to leverage supporting business growth.

Statutory minimum capital and capital adequacy requirements

The SBP through its BSD Circular No. 07 dated April 15, 2009 has prescribed the minimum paid-up capital (net of accumulated losses) for Banks to be raised to Rs.10,000 million by the year ending December 31, 2015. The paid-up capital of the Bank as at December 31, 2019 stood at Rs.12,241.798 million (2018: Rs.12,241.798 million) and is in compliance with SBP requirements.

Under the SBP's Framework for Domestic Systemically Important Banks (D-SIBs) introduced vide BPRD Circular No. 04 of 2018 dated April 13, 2018, UBL has been designated as a D-SIB. In line with this framework, the Bank is required to meet the Higher Loss Absorbency (HLA) capital charge of 1.5%, in the form of Additional CET 1 capital, on a standalone as well as consolidated level during 2019. As per SBP's designation of D-SIBs for the year 2019, the HLA capital charge required to be maintained by UBL has been reduced from 1.5% to 1.0%. The revised HLA capital charge will be applicable from March 31, 2020 and will remain effective till next D-SIB designation is announced by the State Bank of Pakistan.

Banks are required to maintain a minimum Capital Adequacy Ratio (CAR) of 10.0% plus capital conservation buffer of 2.5%. Furthermore, UBL is required to maintain a High Loss Absorbency Requirement of 1.5% of the risk weighted exposures of the Bank. Further, under Basel III instructions, Banks are also required to maintain a Common Equity Tier 1 (CET 1) ratio and Tier 1 ratio of 6.0% and 7.5%, respectively, as at December 31, 2019. As at December 31, 2019 the Bank is fully compliant with prescribed ratios as the Bank's CAR is 17.96% whereas CET 1 and Tier 1 ratios stood at 13.07% and 14.18% respectively. The Bank and its individually regulated operations have complied with all capital requirements throughout the year.

Under the SBP's Framework for Domestic Systemically Important Banks (D-SIBs) introduced vide BPRD Circular No. 04 of 2018 dated April 13, 2018, UBL has been designated as a D-SIB. In line with this framework, the Bank is required to meet the Higher Loss Absorbency (HLA) capital charge of 1.5%, in the form of Additional CET 1 capital, on a standalone as well as consolidated level during 2019. As per SBP's designation of D-SIBs for the year 2019, the HLA capital charge required to be maintained by UBL has been reduced from 1.5% to 1.0%. The revised HLA capital charge will be applicable from March 31, 2020 and will remain effective till next D-SIB designation is announced by the State Bank of Pakistan.

Under the current capital adequacy regulations, credit risk and market risk exposures are measured using the Standardized Approach and operational risk is measured using the Basic Indicator Approach. Credit risk mitigants are also applied against the Bank's exposures based on eligible collateral under comprehensive approach.

Tier 1 capital comprises of Common Equity Tier 1 (CET 1) and Additional Tier 1 (AT 1) capital.

CET 1 capital includes fully paid-up capital, balance in share premium account, reserve for issue of bonus shares, general reserves as per the financial statements and net unappropriated profits.

AT 1 capital includes instruments meeting the prescribed SBP criteria e.g. perpetual non-cumulative preference shares.

The deductions from Tier 1 capital include mainly:

- i) Book value of goodwill / intangibles;
- ii) Shortfall in provision
- iii) Deficit on revaluation of available for sale investments - AFS & fixed assets;
- iv) Defined benefit pension fund asset
- v) Investment in own shares
- vi) Reciprocal cross holdings in equity capital instruments of other banks, financial institutions and insurance companies;
- vii) Investment in mutual funds above a prescribed ceiling;
- viii) Threshold deductions applicable from 2014 on deferred tax assets and certain investments;

Tier 2 capital includes general provisions for loan losses, net surplus on the revaluation of fixed assets and revaluation of AFS securities (fixed income investments and equity investments), foreign exchange translation reserves and subordinated debts (meeting the revised eligibility criteria). The deductions from Tier 2 include mainly:

- i) Reciprocal cross holdings in other capital instruments of other banks, financial institution and insurance companies;

1.7 Credit risk - General disclosures

The Bank follows the Standardized Approach for its credit risk exposures, which sets out fixed risk weights corresponding to external credit ratings or type of exposure, whichever is applicable.

Under the Standardized Approach, the capital requirement is based on the credit rating assigned to counterparties by External Credit Assessment Institutions (ECAIs) duly recognized by the SBP. The Bank selects particular ECAIs for each type of exposure. The Bank utilizes the credit ratings assigned by Pakistan Credit Rating Agency (PACRA), Japan Credit Rating Company Limited – Vital Information Systems (JCR-VIS), Fitch, Moody's and Standard & Poors (S & P).

Types of exposure and ECAIs used

Credit Risk: Disclosures with respect to Credit Risk Mitigation for Standardized Approach

The Bank has adopted the Comprehensive Approach of Credit Risk Mitigation for the Banking Book. Under this approach, cash, lien on deposits, government securities and eligible guarantees etc. are considered as eligible collateral. The Bank has in place detailed guidelines with respect to the valuation and management of each of these types of collateral. Where the Bank's exposure to an obligor is secured by eligible collateral, the Bank reduces its exposure for the calculation of capital requirement by the realizable amount of the collateral, adjusted for any applicable haircuts.

No credit risk mitigation benefit is taken in the Trading Book.

For each asset class, the risk weights as specified by the SBP or corresponding to the SBP rating grades are applied to the net amount for the calculation of Risk Weighted Assets.

2 Leverage Ratio

The State Bank of Pakistan (SBP) through its BPRD Circular No. 06 of 2013 has issued instructions regarding implementation of parallel run of leverage ratio reporting and its components from December 31, 2013 to December 31, 2017. During this period the final calibration, and any further adjustments to the definition, will be completed, with a view to set the leverage ratio as a separate capital standard on December 31, 2018.

The Basel III leverage ratio is defined as the capital measure (the numerator) divided by the exposure measure (the denominator), with this ratio expressed as a percentage:

$$\text{Leverage Ratio} = \frac{\text{Tier 1 capital (after related deductions)}}{\text{Total Exposure}}$$

The Leverage ratio of the Bank for the year ended December 31, 2019 stood at 5.32% (2018: 4.87%) and is in compliance with SBP minimum requirement of 3%.

3 Liquidity Coverage Ratio*

Global Asset & Liability Committee (GALCO) is responsible for reviewing and approving the liquidity risk limits, ensuring the liquidity risk management practices are in line with the defined strategy. GALCO is also responsible to recommend Liquidity Risk policy for approval to BRCC / BOD. Market & Treasury Risk Division is responsible to propose, recommend and institutionalize liquidity risk management policy which is approved by the Board.

Liquidity risk is defined as the risk that a bank does not have sufficient financial resources to meet its obligation and commitments as they fall due and have no other choice to secure funds at a higher cost. The Bank ensures to maintain a diversified portfolio of liquid assets and funding base. Sources of funding comprise of a good mix of core deposits. All liquidity limits including deposit concentration is reviewed in ALCO on a periodic basis. The Bank performs its Liquidity stress test on a regular basis in order to ensure that sufficient liquidity is always available in order to fulfill Bank's financial commitment.

Further Liquidity Risk Management is quantified by Liquidity coverage ratio and Net Stable funding ratio as communicated by the Regulator. Liquidity Coverage Ratio (LCR) refers to the highly liquid assets held by the bank to meet its short term obligations. LCR is used as a tool to manage liquidity risk. LCR has two components: high quality liquid asset (HQLA) and total net cash outflows. HQLA comprises of those assets that can be readily sold or employed as collateral for obtaining fund HQLA structure has been divided into 1) cash and treasury balance, 2) marketable securities, 3) corporate debt securities with credit rating, 4) non-financial equity shares.

4 Net Stable Funding Ratio*

Net Stable Funding Ratio (NSFR) is used to reduce funding risk over a longer time horizon by requiring banks to fund their activities with sufficiently stable sources of funding in order to mitigate the risk of future funding stress. The NSFR limits overreliance on short-term wholesale funding, encourages better assessment of funding risk across all on – and off-balance sheet items and promotes funding stability. The ratio is defined as the amount of available stable funding (ASF), relative to the amount of required stable funding (RSF).
